

HARSHITHA DEVINENI

+1 (227) 254-6014 | hd2810@nyu.edu | linkedin.com/in/harshitha-devineni | New York, NY

Summary : NYU Technology Management Student | Founder | Ex-Intel

Structured problem solver with an entrepreneurial mindset operating at the intersection of business, technology, and people. Built and scaled in-house hardware/software robotics systems from concept to revenue, combining analytical rigor, financial modeling, and cross-functional execution. Seeking strategy consulting roles to drive measurable impact while continuously learning and growing.

EDUCATION

New York University

Sept 2025 - May 2027 (Expected)

MS, Management of Technology | Merit Scholar, 4.0 GPA

New York, NY

Courses: Strategy, Financial Analysis, Economics, Marketing, Change Management, Supply Chain Management, Organizational Behavior, Data Governance

Vellore Institute of Technology

Jul 2018 - May 2023

M.Tech Integrated, Software Engineering | Top 1%, 3.9 GPA

India

Courses: Machine Learning, Data Structures and Algorithms, Statistics, Lean Startup Management, Principles of Management, Corporate Law 101

WORK EXPERIENCE

New York University

Jan 2026 - Present

Administrative Analyst

New York, NY

- Applied structured problem-solving to clean and standardize Salesforce datasets, identifying data inconsistencies and improving data reliability to support downstream analysis and operational reporting and decision-making.
- Produced operational reporting and presentation-ready materials for senior leadership; managed cross-functional communications and translated operational data into structured insights to drive process adoption.

Mechonyx Automation | B2B Robotics Startup

May 2023 - Jun 2025

Co-Founder and Chief Operations Officer (Jan 2024 - Jun 2025) | Lead Software Engineer, R&D (May 2023 - Dec 2023)

Bengaluru, India

- Owned end-to-end product lifecycle for fully in-house autonomous robotic system (hardware + software), coordinating cross-functional engineering, sales, and operations teams from concept through customer validation to commercial launch using Agile/Scrum.
- Ran structured discovery interviews and competitor benchmarking across 3 target verticals; translated ambiguous client pain points into actionable PRDs and feature roadmaps, reshaping product scope and accelerating pilot-to-paid conversion.
- Built investor-grade financial models including TAM/SAM analysis, unit economics, and P&L scenarios to support early-stage fundraising and market-entry strategy; built dashboards tracking KPIs, burn rate, and competitive positioning; pitched to prospective investors and anchor clients;
- Designed and delivered change management frameworks for 5+ B2B enterprise clients, reducing system downtime by 30% through structured implementation planning and technology adoption strategies.

Intel Corporation

Aug 2022 - May 2023

Software Development Intern, GPU Driver Development

Bengaluru, India

- Identified a systemic regression failure pattern across sprints by mapping cross-sprint data to upstream test environment configurations; proposed a diagnostic framework, reducing resolution time by 66%, building firsthand fluency in how decisions and initiatives land inside large organizations.
- Proactively automated 80% of regression testing by streamlining root cause analyses into a structured process using Python, eliminating 5+ hours of manual work per week; authored debugging SOPs driving cross-team adoption in a large-scale, matrixed organization.
- Tested and improved GPU rendering performance by 12% in frame rate and 7% in latency through systematic shader optimization and structured diagnostic analysis; results validated in production driver benchmarks.
- Participated in sprint planning, backlog grooming, and code reviews, gaining exposure to full SDLC in a large-scale enterprise environment.

PROJECTS AND LEADERSHIP

- VR Exposure Therapy App:** Owned full product lifecycle (Figma, VR / Unity, Firebase, Python analytics) for a clinician-facing PTSD therapy tool; validated end-user use cases and translated ambiguous problem space into a structured, partner-ready solution with biometric dashboards.
- NYU Student Government - Senator at Large** (Oct 2025 - Present): Elected representative for Women in Business and Sustainability; attends senate sessions and surfaces graduate student priorities in institutional decision-making.
- NYU WIBE Club - Graduate Representative** (Nov 2025 - Present): Organizes industry engagement sessions for graduate members; manages speaker coordination and cross-cohort facilitation.
- VIT Robotics Club - Vice President** (2019 - 2020): Organized national robotics competition with 500+ participants, managing end-to-end logistics, multi-team coordination, and cross-functional execution at scale.
- ViTeach - Volunteer STEM Teacher** (Nov 2018 - Oct 2020): Designed and delivered structured STEM curriculum for underprivileged children across two academic years.

SKILLS

- Strategy and Operations:** Structured Problem Solving, Business Case Development, Hypothesis-Driven Analysis, Competitive Intelligence, Stakeholder Management, Cross-functional Facilitation, Agile/Scrum, Sprint Planning, Change Management, Requirements Engineering, Jira
- Product Management:** Product Lifecycle Management, PRD Authoring, Roadmap Definition, End-User Use Case Development, Competitive Analysis, Market Research, Value Proposition Development, Product Positioning, GTM Planning, Business Planning, Cost Modeling.
- Data and Reporting:** Advanced Excel (proficient), Power BI, Tableau, Google Analytics, Google Sheets, Financial Modeling (TAM/SAM, Unit Economics), Salesforce, Smartsheets.
- Technical:** Python, Java, SQL, AWS, Docker, Figma, REST APIs, LLMs, Prompt Engineering, Native App Development, Flutter, Unity.
- Certifications:** Google Data Analytics Professional Certificate | IBM Program Manager Professional Certificate.
